» Pedestrian Barrier System

Pedestrian Barrier System

Your most important barrier is the one separating your workforce from the four-ton forklift careening across your warehouse floor.

Our fully modular system keeps your people safe and your business protected—with the most advanced protective system ever designed.

Pedestrian Barrier System

- Energy Absorbing - Impacts are directed along the rails & into the concrete
- Complete Protection- Post and rail system protects the entire area
- Modular Design - Accommodates any space, regardless of size

Energy absorbing design with shock-diffusing posts

Internal hardware eliminates catching & tripping points

Iron core is paired with an industrial rubber damper for strength & shock absorbency
