

# How to compare machine guarding?

» Notes on your quote

To allow us to review your quote quickly and carefully, please note the following questions. This will ensure that you are not comparing apples and pears!

- ★ Have you made sure that your quote includes the material you want in terms of height, mesh size, panel frames and floor supports? Alternative quotes may differ.
- ★ Have you received your quote in the desired colour specification?
- ★ Are the correct closures and locks included?
- ★ Are there any specific requirements for floor mounting of the posts? Anchor fixings M10x80 (thread length 39 mm), normally galvanised (A2K) are included with the delivery as standard.
- ★ Are you familiar with our cable tray system X-Tray for X-Guard? A flexible and perfect complement to X-Guard.
- ★ Installation? The click-on function means easy and quick installation. One fitter is only required to install Axelent machine guards.
- ★ Quick release for any replacement? Our panels can only be removed with the special X-Key. Forget about other tools.
- ★ Do you need scheduled delivery date? Fixed delivery dates can be arranged for an additional charge.
